ORGANIZES A COUNTRY CLUB

Special Cable to The Washington Hersht.
London, Nov. 22—Mrs. Victoria Calaflyn Woodhall Martin has started a unique
work in England. She lives at the Manoz
House, at Breslons Norton, near Tewkesbury, in the west of England, in the cen-ter of a rural district which might be

sury, in the west of singuland, in the center of a roral district which might be termed one of the "darkest" in Great Britain from the point of view of education and intellect.

At first surprised and later borrified by the awful mental and spiritual dead-times of the place. Mrs. Martin inaugurated a scheme to bring a few rays of tistellectual light into the minds of the inhabitants who, by irony of fate, are separated only a few miles from the country of Shakespeare.

She formed a club called the "International County Salon," and, with the aid of her literary and theatrical friends, she set to work to improve the conditions of those around her. She gave up the use of her beautiful house—an old Tudor house, where oaken beams traverse the cellings, set in an atmosphere revviling in sunlight, redoinnt with oil English flowers, and filled with the peace of the countryside—three and four nights a week to the laborates on the farms, and she fitted un the arcitect born as a reincuture. to the laborers on the farms, and she fitted up the ancient barn as a miniature but modern theater.

Special Calle to The Washington Heald.
Paris, Nov. II.—Harry G. Thomas, son of the late Mag Gen. Henry G. Thomas, shortly will sail from Marsellles to the Persian Gulf, taking with him a special type of steam dredge, with which he hopes to scoop up millions of dollars worth of pearls. Thomas invented the dredge. This antonucement settles the mystery which has set the Marselles huyers on their ears during the chartering and leading of the inventor's brig during the peart faw weeks.

Thomas said today that his, dredge will pick up pearl oysters at a depth of forty-dwe feet, which hitherto has been unsattainable by saitive fishers. Ho can employ his system all the year round, whereas formerly only two months, May and September, were possible for the prosecution of this industry. While his brig is in the Persian Gulf her crew will also search the Arabian Coast for rich mineral deposits which are said to abound in that locality.

Rome, Nov. Z.—Among the numbertiess courtesies showered upon the satiors of the visiting American aquadron by the Italian subtortities none has made an impression so great as that whereby the officers and crews were allowed to travel over the state railroad system, visiting all the principal cities, at a 75 per cent reduction in raises.

Never before has this facility been granted to visiting sallors. As originally planned, Admiral Millo, minister of maintenance of all missours and art galleries rine, wished to offer to the visitors the most extensive entertainment possible, but when bold that this would upset the seducational character of the visit, Admiral Millo accomplished an equally graceful act by placing the American sallors upon an equal footing before the Italian laws with Italian callors and ediders.

When the officer of the Florida discovered that he was able thus to travel from Naples to Rome for one dollar, he syclaimed: "Admiral Millo has converted into the state ownership of railroads."
